

CLEAN & CARE

Finish and maintenance products from one single source

...guarantees best protection and longevity of your flooring

Every high quality surface must be properly maintained to preserve its value. Klumpp has dedicated their year-long surface expertise to further develop their easy-to-use Klumpp Coatings' Clean and Care product range. Their program covers all requirements of daily wear and tear like regular cleaning, refreshment, protection and even the repair of UV-sealed, UV-oiled and naturally oiled floors.

ENVIRONMENTAL RESPONSIBILITY

- No Carcinogens
- REACH approved raw material
- No formaldehyde
- No heavy metals
- No insecticides, pesticides and herbicides
- Complies to DIN EN 71-3 (phthalate free)

Klumpp coatings meet the most stringent environmental and personal health standards! Klumpp Coatings offers one source for highest quality UV coatings as well as complementary Clean & Care products. Below is a brief summary of the care products needed to preserve the beauty of your (hardwood) flooring.

CLEAN & CARE INTERVAL

The care interval depends on the actual wear & tear of the flooring. The following recommendation should be seen as rough indication:

- Low frequented areas (residential areas) : about every 2-4 weeks
- Medium frequented areas (offices) : about every 1-2 weeks
- Highly frequented areas (public areas) : about every 1-2 days

Severe damages, especially worn-off areas, need to be repaired immediately.

CARE INSTRUCTIONS FOR UV FINISHED & OILED FLOORS

Klumpp Coatings' Clean & Care products ensure your surface retains its natural beauty also in the future.

1. Dry cleaning

- The best way to remove loose, coarse dirt (e.g. dust and sand particles) is the regular use of a soft broom or vacuum cleaner.

CLEAN & CARE

2. Wet cleaning

- After dry cleaning, wipe the floor with vinegar water and a damp, well wrung-out household mop (no micro-fiber). Allow the floor to dry. Done.
- In cases where cleaning with vinegar water is not sufficient, we recommend the use of our HYDRO CLEANER CONCENTRATE.
- HYDRO CLEANER CONCENTRATE is a wax remover. It should be diluted 1:10 (one part of HYDRO CLEANER to 10 parts of water) or applied undiluted with a soft cloth for partial cleaning.
- Apply HYDRO CARE CONCENTRATE with a damp, well wrung-out household mop and wipe the floor.
- After use, we recommend the re-establishment of a new protective layer with HYDRO CARE CONCENTRATE.

3. Maintenance

- Apply HYDRO CARE CONCENTRATE with a damp, well wrung-out household mop after thorough cleaning with HYDRO CLEANER CONCENTRATE and wipe the floor.
- It should be diluted 1:50 (1 part of Hydro Cleaner to 50 parts of water). Allow for drying. Done.

IMPORTANT NOTES

When applying Clean & Care products to your floor, please make sure to avoid standing water. This will damage your hardwood flooring (swelling of the wood).

Cloths or pads soaked with NATURAL OIL CARE - must be immersed in water to avoid self-ignition!

It is strongly recommendable to:

- Attach felt gliders or rollers to chairs legs.
- Place dirt-trapping carpets or mats in entries. Dirt and sand act as sandpaper.
- Avoid using too much water during cleaning because high absorption of the water may cause damage to the wood. Care and cleaning processes should be done with a damp cloth and not too wet.
- Remove any spots immediately.
- Not to use micro fibre cloths, steel chips, and high-pressure cleaners. Also no alkaline cleaning agents should be used for normal cleaning since such agents have the tendency to cause colour changes of the wood.
- Place heavy furniture carefully.
